## A Message From

# The Chairperson

---

Warm greetings from Purnomo Yusgiantoro Center!

As it is known, there is not only COVID-19 that has become our matter, but also the war between Russia and Ukraine has been the issue for quite some time; yet the effect of the war had an impact on other countries, including Indonesia. It has an effect on the Indonesia's economy, especially in increasing commodity prices. Owing to this condition, PYC hopes that all parties could have effective solutions and implemented immediately in Indonesia.

Meanwhile, PYC remains active in its contribution in energy and natural resources sector, and social activities during the first quarter. This newsletter provides a brief summary of our previous activities and accomplishments. We also would like to express our heartfelt gratitude for individuals and several organizations who have trusted PYC as a main partner for exciting research and social collaborations for this year.

Last but not least, Ramadhan is already in our sight. With all humility, PYC would like to apologize for every mistake, which made by intentionally or not. May we all always be in the forgiveness of Almighty God. For all colleagues, who are going to run this holy month, we wish you have an incredible Ramadhan this year.

**Best Regards,**

*Filda Citra Yusgiantoro, Ph.D.*

## THE OPINION

is a channel to assert various point of views related to topics in the energy and natural resources sector

### Indonesia Should Speed Up Its Coal Retirement Program to Support Energy Transition

By: Vivi Fitriyanti (Researcher at Purnomo Yusgiantoro Center)  
Massita Ayu Cindy (Researcher at Purnomo Yusgiantoro Center)

Indonesia is struggling to prove its commitment to boost renewable energy. While the government's latest national electricity plan (RUPTL) promotes a much higher portion of renewable energy, coal is still projected to be the primary source of power (59.4%) by the end of decade.

And instead of accelerating the renewable energy transition, the government plans to ban coal exports to keep its coal fleet running.

The decision seems to contradict Indonesia's plan to provide more green energy in the future. It's also causing geopolitical tension.

### Geopolitics of Critical Minerals Towards Energy Transition

By: Akhmad Hanan (Researcher at Purnomo Yusgiantoro Center)  
Mayora Bunga Swastika (Researcher at Purnomo Yusgiantoro Center)

There is no denying that all countries in the world should use clean energy in the future. Based on the agreement at the 26<sup>th</sup> UN Climate Change Conference of the Parties (COP26) in Glasgow and several other important international meetings, several countries began to decarbonize their electrical energy systems. With the transition agenda towards clean energy and net zero-emission, the need for raw materials for critical minerals for energy storage and core components of new and renewable energy technologies will increase in the future.

### **How the Russia-Ukraine War Has Slammed Indonesia's Energy Security**

By: I Dewa Made Raditya Margenta (Researcher at Purnomo Yusgiantoro Center)  
Filda C. Yusgiantoro (Senior Researcher at Purnomo Yusgiantoro Center)

---

Despite being just over a week, the conflict between Russia and Ukraine has already had a significant impact on Indonesia's energy sector, revealing the extent to which the country's energy policy remains vulnerable to external shocks.

Over the past few months, the world has cautiously monitored the mounting tensions between Russia and Ukraine, which culminated in Russia's invasion on 24 February 2022. Throughout that time, markets have churned over the Russia-Ukraine dispute, as indicated by rising energy prices.

### Energy Drink by PYC Ep. 24 – *What is 'Just Transition'?* (Feat. Prof. Raphael Heffron)

---

The image is a promotional graphic for a podcast episode. It features a dark background with yellow and white text. In the top left corner is the logo for 'The PURNOMO YUSGANTORO 2018'. In the top right corner is a logo for 'ENERGY DRINK' with a blue battery icon and the text 'Your Favorite Energy Podcast'. The main title 'ENERGY DRINK #24' is in a yellow box, followed by 'WHAT IS "JUST TRANSITION" AND WHY WE NEED TO TALK ABOUT IT' in large white letters. On the left, there is a circular portrait of Budi Sunariyanto, S.T., M.Sc. (Researcher PYC) with the text 'HOSTED BY: BUDI SUNARIYANTO, S.T., M.SC. (RESEARCHER PYC)'. On the right, there is a portrait of Prof. Raphael Heffron with the text 'PROF. RAPHAEL HEFFRON DEAN OF THE FACULTY OF LAW THE UNIVERSITY OF THE WEST INDIES (THE UWI) ST. AUGUSTINE CAMPUS'.

Have you ever heard about "Just Transition"? What is the history behind the term "Just Transition"? What are the key concepts? Many countries have continued to transition away from emissions-intensive energy sources to address the climate challenge. The importance of reaching a 'just transition' in facing transformational changes has increased significantly in the last few years.

Furthermore, to deliver on the SDGs and ensure a sustainable future, each country needs to consider a transition pathway that is contextual from the nation itself. "Just Transition" to a low carbon economy is essential, and the change is happening fast globally. Indonesia must respond quickly and be innovative in the way they work. One of the PYC Researchers, Budi, will discuss the issues exclusively with Prof. Raphael Heffron, Dean of the Faculty of Law at the University of the West Indies, St. Augustine.

## Indonesian Journal of Energy Vol. 5 No. 1

---

Indonesian Journal of Energy Vol. 5 No. 1 (February 2022) has been published with five papers in the journal. The papers are:

1. Design of Integrated Electrochromic-Photovoltaic Technology for Smart Windows to Improve Building Performance and Energy Efficiency: A Material Approach by Laurentius K. Hendinata, Ahmad I. R. Fikri, & Michael A. Suprpto
2. Reorienting the Principle of Sustainable Development in Investing Policy Utilizing Natural Resources and Energy in Indonesia by Wahyu Nugroho
3. Indonesia's Energy Relations with the Gulf Cooperation Council Countries: Drivers and Progresses by Zulfikar Rakhmat & M. Habib Pashya
4. Developing Innovative Financing Scheme for Leveraging Energy Efficiency Deployment in Indonesia by Robi Kurniawan & Irwan W. Kurniawan
5. Energy Storage Applications to Address the Challenges of Solar PV and Wind Penetration in Indonesia: A Preliminary Study by Mukhamad F. Umam, Sesi Selia, Amrullah F. Sunaryo, & Muhammad R. Al Asy'ari

## Indonesia Energy Kaleidoscope 2021

---

Indonesia Energy Kaleidoscope 2021 is now available!

In this Kaleidoscope, our research team has selected eight major events in Indonesia's energy sector throughout 2021. Included in those events are policy and regulation updates, renewable energy developments, energy market and international issues that have impacted Indonesia's energy sector.

Indonesia's energy sector has faced tough challenges, but there are also many new opportunities for development. Many efforts had been done and were aimed to help Indonesia achieving energy security in the near future and to prevent the negative effect of the energy crisis.

# Events in Energy Sector

### ITB Energy Innovation Competition

---

On 14 January 2022, one of our research assistants, Vivi Fitriyanti, was invited to be a judge at ITB Energy Innovation Competition. The Competition was held by IATMI SM ITB, HMTM “PATRA” ITB, and HIMATEK ITB. This competition aims to encourage the self-actualization spirit of students in competing related to the science and profession

of petroleum engineering; and to also increase the competitive nature of students related to the science and work of petroleum engineering. In this competition, the students proposed an innovative solution regarding the climate crisis in Indonesia. The participants were challenged to deliver their ideas on how to mitigate the environmental issue in the petroleum sector as they are the future leaders that will manage the sectors. The participants brought exciting factors and ideas, such as the economic side, technological issues, and innovation during the pitching. It is so heartwarming that they care about the climate crisis issue since they are the ones that will lead this industry in the future.

### SPE Java Annual Energy Symposium 2022 Reshaping Indonesia's Energy Future Through Collaboration

---

On 24 February 2022, Prof. Purnomo Yusgiantoro was invited to share his thoughts on SPE Java Annual Energy Symposium 2022. The theme of this event was “Fueling Indonesia’s Future Through Energy Collaboration.” This event was held to support Indonesia’s goals on achieving the Energy Mix 2025 target. The symposium comprised numerous pre- and main events that aimed to create a platform, where energy professionals, academia and regulators could share their knowledge and expertise. At this event, Prof. Purnomo Yusgiantoro emphasized that the role of all energy stakeholders, including NGOs and Media, are critical to support energy transition pathways and bolster Indonesia’s energy security.

### **IPFEST Paper and Poster Competition 2022: The Role of Science and Technology as Catalysts in Reaching Future World's Energy Sustainability**

---

On 24 February 2022, I Dewa Made Raditya Margenta represented PYC to be a judge for the IPFEST Paper and Poster Competition 2022. This event was part of IPFEST 2022 held by the Petroleum Student Union of Institut Teknologi Bandung. IPFEST is an international series of events that includes oil and gas themed competitions, exhibitions and seminars. In the Paper and Poster Competition, four grand finalists presented their ideas and innovation on highlighting the role of science and technology as catalysts in reaching the future world's energy sustainability. All participants successfully showed amusing ideas and concepts that strongly align with the mission of achieving sustainable energy.

### **SPE Diversity and Inclusion (DI) Leadership Series - Women in Energy Talk**

---

On 25 February 2022, Chairperson of Purnomo Yusgiantoro Center (PYC), Mrs. Filda C. Yusgiantoro became a speaker at the Diversity and Inclusion (DI) Leadership Series - Women in Energy Talk, hosted by the Society of Petroleum Engineers Java Section. This biennial event is intended not only for sharing the speakers' leadership experience, contribution in field operation, and strategic business process, but also for women empowerment.

On this occasion, Mrs. Filda talked about "Oil and Gas Transition Innovations to Achieve Energy Mix and Net Zero by 2050". She delivered the perspective of the global and national NZE 2050 scenario as well as the oil and gas Industry roadmap to SDGs. According to her presentation, the oil and gas industries should diversify its business, utilizing CCS/CCUS and flare gas, along with shifting skills to technology, to achieve the NZE 2050 target as well as contribute to the SDGs. Not limited to that, she also shared her perspective about women leadership and empowerment.

### **Afternoon Talk: Be The One Who #BreakTheBias by WomenInEnergy.id**

---

“Be The One Who #BreakTheBias” by Women In Energy was held in order to commemorate International Women's Day (IWD) on 8 March 2022. International Women's Day is celebrated to accelerate equality of women in all aspects. This year, Women In Energy's webinar theme is #BreakTheBias and with raising this topic, it is hoped that this event could be a platform with visions to inspire and empower more Indonesian women to become impactful leaders in their lives. Because of this, Women In Energy invited Mrs. Filda C. Yusgiantoro, Chairperson of the Purnomo Yusgiantoro Center, as the speaker on Instagram Live in @womeninenergy.id. The discussion ran on topics related to Mrs. Filda's experience of being biased as a female leader. Her experience as a female leader, inspired many female figures to break the gender bias, and for Mrs. Filda herself, she could prove herself as a successful female leader, especially in the energy sector foundation.

### **Ruang Bincang Energi #13: "FOSTER (Forest and Water) as Potential Energy for National Electricity."**

---

On 28 March 2022, Vivi Fitriyanti, one of our research assistants at PYC, was invited to be a speaker in *Ruang Bincang Energi #13 2022 Webinar*. *Bincang Energi* is a platform that supports the achievement of the Sustainable Development Goals (SDGs) goals, 4,7 and 13. It has a mission to increase energy literacy in the community, especially for the younger generation, by facilitating energy enthusiasts to share experiences, insights and knowledge related to the field of sustainable energy. *Bincang Energi* provides comprehensive information on various energy topics.

Through the *Ruang Bincang Energi #13: “FOSTER (Forest and Water) as Potential Energy for National Electricity,”* this webinar is expected to become one of the online educational media to provide insights and to increase public awareness on the importance of energy and its role in becoming part of the solution to the energy crisis and decarbonization for a better environment.

The webinar was attended by Communities, organizations, or companies in Energy and the Environment, Students, Enthusiasts in the field of Energy and the Environment, and the general public. This webinar was

## EVENTS IN ENERGY SECTOR

also attended by Mr. Jaya Wahono from Clean Power Indonesia, Ms. Verena Puspawardani from Hutانيتuid, Mr. Imam Teguh Islamy from AGEV, and Mr. Afrizal Faisal, an NRE Practitioner.

## The Launching of the ASEAN Gender-Energy Report: Development Finance

Chairperson of Purnomo Yusgiantoro Center, Filda C. Yusgiantoro was honored to participate as the Keynote Speaker at the launching of the ASEAN Gender-Energy Report: Development Finance. The event was held online on 29 March 2022. In her speech, she believed women are closely connected with energy, especially women in ASEAN who have an essential role in providing and using energy to support their families at home. Furthermore, she said that access to adequate quality and affordable energy services will reduce poverty, increase health and generate more income for the family. In her closing statement, she explained that Purnomo Yusgiantoro Center has done research about crowdfunding in the energy sector. The research shows there is an enormous potential for using crowdfunding to finance green, health, and education projects, and this does not rule out the possibility of including women empowerment.

# Social Initiatives

### **PERWATUSI and PYC Care for Flood Victims**

---

*Perkumpulan Warga Tulang Sehat Indonesia (PERWATUSI) dan Purnomo Yusgiantoro Center (PYC)*

Perkumpulan Warga Tulang Sehat Indonesia (PERWATUSI) and Purnomo Yusgiantoro Center (PYC) went to the flood location in Serang, Banten, to make donations to flood victims on Tuesday, 8 March 2022. Flash floods that hit Serang, Banten caused by heavy rain on 1 March 2022 had caused the Cibanten River to overflow until the flood level reached two meters.

PERWATUSI and PYC provided donations in the form of basic necessities and some clothes for the victims.

Quoted from *liputan6*, the flood submerged around 2,413 houses and caused 3,500 residents to evacuate. Heavy rain on the night of 28 February until 1 March 2022, caused the Sindangheula dam to overflow and run to the Cibanten River that passed through the city center, residents' villages, and its upstream was on the Karangantu Beach, Kasemen, Serang City, Banten.

### **Wayang Orang Milenial “Srikandi Kembar” by PYC Bhakti Budaya**

---

*PYC Bhakti Budaya*

Purnomo Yusgiantoro Center (PYC) held a PYC Bhakti Budaya event in the form of a *Wayang Orang Milenial*. This performance was a collaboration with RBN Puspo Budoyo. South Tangerang Mayor, Drs. H. Benjamin Davnie together with the Board of Trustees of the Purnomo Yusgiantoro Center, Luky A. Yusgiantoro, B.Sc., M.Sc., Ph.D. attend the event.

The event, which was held on Sunday, 13 March 2022, at 20.00 WIB is also a form of manifestation of PYC's love and responsibility for the sustainability of one of the nation's cultures, namely the Puppet Art.

*Wayang Orang Milenial* with the title "Srikandi Kembar " tells of a king from the Kingdom of Giri Puro named Dendo Wikeso, who is hurt by the Pandavas because he kills his father, Prabu Dibyo Kumoro. Because Giri Puro's strength is not comparable to that of the Pandavas, he uses cunning methods to kill them. Dendo Wikeso changes his form into Heroine to steal Jamus Kalimosodho (a sacred heirloom belonging to the Pandavas).

# Other Events

## Guest Talk "Mental Wellbeing during Pandemic"

In this first quarter, PYC held an internal event for the staff and researchers. Since the pandemic time, employee's mental health had become the one of main concerns for PYC. Thus, on 15 February 2022, we held a Guest Talk with the theme of "Mental Health Wellbeing". For this Guest Talk, we invited dr. Anggia Hapsari, Sp. KJ(K) as the speaker. The topics that were brought up and discussed together are how to take care of mental health during pandemic time, how to keep work life balance while working at home, and the tips to overcome burnout. At the end of the Guest Talk, all the participants took a mini screening test about their mental health.

## KSS: Etika Penulisan Bahasa Indonesia

This year, PYC has a new program for internal departments. The program is "Knowledge Sharing Series" or KSS. This program aims for employees to share their knowledge with one another. The knowledge shared is very diverse considering that the staff and researchers at PYC have various academic backgrounds. The first KSS that was held was "Indonesian Writing Ethics" on 23 February 2022. This KSS discussed how to use Bahasa Indonesia grammar in writing letters, articles, emails, documents, reports, and other writing media. The participants not only got the grammar materials, but they also took a mini test to test their ability on Bahasa Indonesia grammar knowledge. This program is planned to be held once in a month at PYC with various themes such as foreign languages, health, tips on working with web-based and computer-based applications, and many more.

The participants not only got the grammar materials, but they also took a mini test to test their ability on Bahasa Indonesia grammar knowledge. This program is planned to be held once in a month at PYC with various themes such as foreign languages, health, tips on working with web-based and computer-based applications, and many more.

## AAJI Friendship Tournament Golf *Piala Bergilir Purnomo Yusgiantoro*

AAJI Golf Tournament (Sinta Nia Puspita)

On Friday, 25 February 2022, Asosiasi Alumni Jesuit (AAJI) held the *Piala Bergilir Purnomo Yusgiantoro* Golf Tournament at Gunung Geulis Golf and Country Club, Bogor, West Java. The tournament was organized to raise funds; and it was attended by approximately 130 golf players.

## **Peringatan 73th Serangan Umum 1 Maret 1949: “Patriot Bangsa Menegakkan Kedaulatan Negara”**

On 2 March 2022, Yayasan Kajian Citra Bangsa (YKCB) held a webinar titled “*Patriot Bangsa Menegakkan Kedaulatan Negara*”. The webinar was held as a commemoration of State Sovereignty Enforcement Day. It also marks the 73<sup>rd</sup> commemoration of the general attack on 1 March 1949. Prof. Purnomo Yusgiantoro, the Founder of PYC, was the keynote speaker in this webinar. Prof. Purnomo conveyed the message that YKCB can play an active role in creating a young generation with “*wawasan kebangsaan*”. Indonesian citizens, with their professions, can protect the sovereignty of the Republic of Indonesia.

PYC 6<sup>th</sup> Anniversary

# PAPER COMPETITION

**"Energy Security for a Sustainable Future"**

## PRIZE\*

Winners must submit their paper to PYC's Indonesian Journal of Energy (IJE).

1 <sup>st</sup> Winner	: IDR 5,000,000	6 <sup>th</sup> Winner	: IDR 2,500,000
2 <sup>nd</sup> Winner	: IDR 4,500,000	7 <sup>th</sup> Winner	: IDR 2,000,000
3 <sup>rd</sup> Winner	: IDR 4,000,000	8 <sup>th</sup> Winner	: IDR 1,500,000
4 <sup>th</sup> Winner	: IDR 3,500,000	9 <sup>th</sup> Winner	: IDR 1,000,000
5 <sup>th</sup> Winner	: IDR 3,000,000	10 <sup>th</sup> Winner	: IDR 750,000

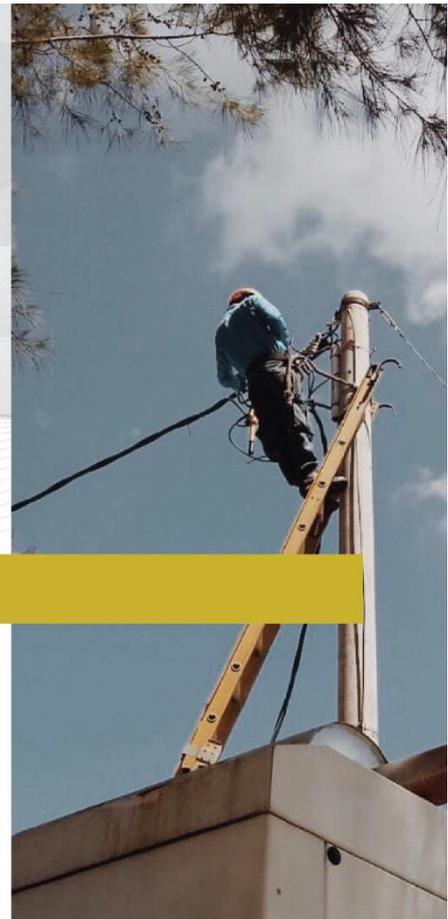

\*Exclusive of all taxes

## SUB-THEMES

- energy security
- energy economics
- energy analysis
- energy modeling
- integrated energy systems
- energy planning
- environmental and energy management
- energy conservation
- energy efficiency
- energy innovation
- fuel and energy technology
- biomass and bioenergy
- new and renewable energy
- energy storage
- energy finance
- energy geopolitics
- energy law and policy

## TERMS AND CONDITIONS

1. The paper can be written by or a product of one or multiple authors;
2. Entries must not contain any discriminatory or obscene language/content;
3. Entries must be of original work;
4. The submitted paper should be written in English;
5. Registrants can submit more than one paper at the same time;
6. Participation in our competitions is free of charge. There is no registration/administration fee associated with the application or submission;
7. The latest submission deadline for the abstract is 28 February 2022 and for the full paper is 29 April 2022;
8. Once the paper is accepted, it can not be withdrawn;
9. Once submitted, all materials will be the property of PYC. Thus, PYC reserves the sole right to reproduce and publish any and all of the entries submitted for this competition on behalf of the original author(s);
10. The final decision of winners is final and deemed absolute. Once announced, it can not be rescinded under any circumstances;
11. The winners will be announced on 16 June 2022;
12. The top ten winners are obligated to submit their paper to the Indonesian Journal of Energy and actively participate in the peer-review process.
